New tasks for land management works and land consolidation in Poland

J. M. Pijanowski, E. Sobas, J. Taszakowski

Land consolidation

Agricultural infrastructure - roads
  - Agricultural transport roads
  - Cycle paths
  - Second building line road

Land consolidation
  - Cultivation complex parameters
  - Ownership and lease
  - Legal status regulation

Farms structure
  - Machines used in agriculture
  - Directions of agricultural production
  - Grassland management
  - Target structure and farm size
  - Association of cattle farmers

Water relations
  - Floods
  - Drainage efficiency
  - Młynówka revitalization
  - Pumping station, culverts

Infrastructure
  - Sewage system
  - Bus stops
  - Renewable energy
  - Kommunikation Transport

Culture / Social conditions
  - Kindergarten
  - Retirement home
  - Library
  - Association „Kosymerzy”
  - Poland - USA
  - Association „Złoty Klos”

Village image / buildings
  - Conservation historic objects
  - Churches and chapels
  - Multi-function hall
  - Manor house
  - Zoning plan
  - Wooden architecture
  - Asbestos

Public spaces
  - Roads
  - Lighting
  - Places

Village renewal

Landscape and nature

Water
  - Big pond
  - „Młynówka” - stream
  - Ponds

Sport infrastructure / rest
  - Sport fields
  - Cycle paths
  - Tourism

Greenery
  - Park
  - Cemetery
  - Greenery system in the village
  - Greenery system outside the village
  - Forest
Summary of the main stages of work in Malopolska with Thuringia and Bavaria projects and the comparison with the stages of the creation of assumptions to a project of land consolidation, currently implemented in Poland (Source: own study)
